

Project 1 Manual

1. Double click the executable file, you should see a small window box like this.

(For Windows 8.1)

2. For Q2, click the button "Open a .wav file"; For Q3, click the button "Open a .bmp file". Clicking either button will open a file chooser dialog box, then you can choose a file to open one at a time.

3. After selecting the file and click "open", you should see a larger new window popping up, with a chart or an image displayed on the screen. For Q3, there are 5 pages and there is a "next page" button at the upper right corner which shows the next page when clicking it. See the picture below.

(If clicking the button on the 5th page, you will be back to the first page).
